

“I selected this software because of the price. It’s very good for small schools. It’s a simple-but very efficient-system. I’m not much of a technological person, so it provided me with what I needed for a good price. We rely on it for record-keeping, reports, scheduling and a monthly attendance record, since we have children from subsidized care.

“We use the billing system also. The tech support is very helpful, and has helped me out when I have gotten myself in a bind. Our budgeting and staffing are based largely on the number of part-time and full-time children we have, so accurate figures are crucial to our system’s flow. On-Q has geared the software for our school’s need at no additional cost.”
