

Press Release

The Accountant's Partner 2003

New! Version 8

We are proud to announce the latest release of The Accountant's Partner 2003, Version 8. The Accountant's Partner provides CPA's, accounting and tax firms with a comprehensive, yet simple approach to practice management. The recent release of Version 8 adds over 30 new features and enhancements to the system, including a PDA interface.

The software provides a centralized location for the daily administration of the services your firm renders, the time consumed in doing these tasks, and the preparation and maintenance of billing and receivables. You may add clients on the fly during invoice processing. An integrated due date tracking system automatically calculates when federal returns and extensions are due. In addition, TAP supplies its users with the ability to track notes, letters, appointments, messages, CPE credits, mileage and related expenses, as well as print labels and rotary cards.

Back up and restore functions are built into the software, as are import and export capabilities. All modules share a common database, eliminating the need to maintain your data in multiple programs.

Single User Price: \$395, Unlimited number of timekeepers!
TAP runs in Windows 95/98/ME/NT4/2000/XP.
